

RSA BSAFE® Share Feature Matrix

A Part of the RSA Share Project

RSA BSAFE® Share is a new product line introduced in April 2009 as part of the RSA Share Project. The project is designed to arm developers with the free tools and support necessary to protect their products and applications. The RSA BSAFE® Share products are versions of our industry-leading RSA BSAFE encryption toolkits available for free download on the community website. These products are available for C/C++ and Java™ development.

We are providing the highest quality free software available as part of the RSA Share Project, but there are some differences between the RSA BSAFE Share products and traditional RSA BSAFE products. The feature differentiation is outlined in the table below.

Please visit the RSA Share Project at www.rsashare.com for product descriptions, downloads and support options.

	RSA BSAFE Share for C++	RSA BSAFE Share for Java	RSA BSAFE Micro Edition Suite	RSA BSAFE SSL-J
Cryptography	✓	✓	✓	✓
