C. Software Service Request Resolution Process

- (i) **Process.** RSA handles all Customer support Service Requests on a first-in-first-out basis. RSA shall prioritize all Errors according to their impact to Customer using the severity definitions described in Section 3(A) above. RSA may upgrade or downgrade the severity of an Error depending on developments during the resolution process. For example, if available, a temporary resolution may be provided to mitigate the material impact of a given Error resulting in the reduction of the severity of a Service Request.
- (ii) **Escalation.** If Customer and RSA are unable to mutually agree upon a resolution plan for S1 and S2 Errors, then the parties shall escalate the Service Request in accordance with RSA’s escalation process. Once the escalation process has been initiated, RSA shall provide Customer with Service Request progress updates via phone or email on a mutually agreed upon schedule. Such progress updates shall include information about the Error description, daily progress, root cause (if known) and overall plan to resolve the Error.

4. HARDWARE SUPPORT. If an Error is identified in the Hardware, RSA shall use commercially reasonable efforts to provide one of the following remedies at RSA’s sole and exclusive discretion: (a) an electronic remedy; (b) spare part replacement; or (c) Advance Replacement of Hardware.

A. Advance Replacement of Hardware. An “Advance Replacement” occurs when RSA authorizes shipment of a replacement Hardware component to Customer prior to the defective Hardware component being returned to RSA for repair. Solely on the approval of an RSA customer care representative and subject to the RSA Return Material Authorization (“RMA”) Process, RSA shall use commercially reasonable efforts to provide an Advance Replacement if an Error is identified in the Hardware. Any Hardware shipped under RSA’s RMA process shall have the same licensed capacity as the original Product regardless of whether such replacement is a newer model of the defective Hardware. RSA posts additional information regarding its Advance Replacement policy on its Support Website.

B. Return Material Authorization (“RMA”) Process. If RSA determines that it is necessary for the Customer to return Hardware to RSA for repair or replacement, Customer must provide RSA with the Hardware component model, serial number, and failure information to initiate the RMA Process. Customer must return Hardware within fifteen (15) calendar days for all other Hardware or Customer will be charged for the Advance Replacement.

- B. Maintaining Product Integrity.** Customer will follow RSA best practices guidelines, which include maintaining an onsite disaster recovery for each Hardware appliance to enable RSA to restore the appliance in accordance with Customer's configuration. Customer agrees to not install any third party non-certified software or modify any existing software or firmware on the Hardware without notification to, and prior authorization by, RSA technical support in order to ensure that RSA's ability to maintain accurate records of Customer's existing environment.

This time period may be extended by RSA at its sole discretion. In order to continue to receive ongoing Maintenance Services hereunder for any Software Release which is beyond its EOPS date, Customers must upgrade to a currently supported Software Release.
