

RSA® ARCHER® GRC EXPERT ON-DEMAND SERVICE

Take advantage of GRC expertise & best practices for implementation prioritization & planning

We can't know everything about security, certainly with the threats changing constantly. That's why it is so important for us to partner with RSA expertise to fill that gap.

CIO International Exchange

Overview

Given the interdependencies and complexity of enterprise GRC initiatives and processes, it is difficult for many organizations to ensure they have the expertise necessary to effectively implement and deploy systems to assist with those efforts. Having access to that expertise is a significant option and advantage to your enterprise's survival.

RSA® Archer® GRC Expert On-Demand service provides RSA Archer consulting expertise for ongoing prioritization and planning for project implementation, staff augmentation, and subject matter expertise to help mitigate the risks associated with implementing a single RSA Archer solution in a reduced timeframe. It also ensures the implementation will follow RSA-recommended practices and support your organization's business requirements.

Support the deployment of your organization's Archer solution, this 40-day level of effort, expended over a twelve-month period delivers:

- Expert consulting services during the planning, installation, and deployment phases of RSA Archer initiatives
- Periodic status reports on all RSA activities summarizing accomplishments, upcoming plans, hours expended to-date, and any issues that require the attention of your management
- An implementation plan, including final prioritization and selection of project tasks and deliverables

Prioritize & Plan for Best Results

RSA Archer Professional Services personnel work closely with your staff to identify, prioritize, finalize, and direct engagement tasks and deliverables related to deployment of one of Archer's solutions. These tasks may include:

- Analysis of business and technology requirements for the in-scope Archer solution
- Review of use case processes and data models for the Archer solution
- Design of the use case with the Archer solution, on-demand applications and/or questionnaires
- Configuration of up to 60 non-calculated fields, up to 20 calculated fields, up to 5 notifications, up to 5 reports, up to 5 data-driven events, up to 2 workspaces, up to 6 iViews, up to 2 access roles, and up to 2 user groups for the in-scope Archer module
- Preparation of one CSV import file for migrating data into the Archer solution

For customers who require more than 40 days of expert time, span more than one Archer solution, or need expanded service tasks to meet extended business requirements, a custom quoted Archer service engagement can be arranged.
