As organizations mature their approach to GRC, they transition from a structure of siloed departments and units to a fully engaged business operation where everyone has a part in managing risk, ensuring compliance and contributing to performance outcomes. This leads to greater confidence, agility and resilience - advantages that ensure success.

**The Journey to Advantaged GRC**

- **Siloed GRC**
  - Focus on compliance
  - Reporting is disconnected
  - Processes are isolated

- **Managed GRC**
  - Focus on risk
  - Reporting is coordinated
  - Processes are defined

- **Advantaged GRC**
  - Focus is on business opportunity
  - Reporting is enterprise-wide
  - Processes are optimized

**COMPLIANCE**

- **Siloed GRC**
  - Did you know we set up so new suppliers in Dubai?
  - No, that means we need to start review of regulations. With we’ll heard about this issue.

- **Managed GRC**
  - We need to set up company-wide policies and training to address this issue.

- **Advantaged GRC**
  - This compliance report says our incident levels are higher than other departments but we don’t know why.

**RISK**

- **Siloed GRC**
  - We’ve asked key managers to tell us their top risks but they all report differently.
  - We monitor external changes that hit the information strategy and operational changes earlier to assess risk

- **Managed GRC**
  - At least everyone is using the same risk assessment method now.

- **Advantaged GRC**
  - We’re flagging changes that impact operations.

**OPERATIONS**

- **Siloed GRC**
  - ARC Company has the best solution
  - WeeBee Software has the best solution
  - ACME Corp. has the best solution

- **Managed GRC**
  - We’ve highlighted the top risks and incidents for you.

- **Advantaged GRC**
  - These reports let us plan and adjust in real time as internal and external factors change.

**AUDIT**

- **Siloed GRC**
  - It’s going to take weeks to reconcile this and find any actionable information.

- **Managed GRC**
  - It’s easier to complete our audits with the same standard reporting system, but we still can’t see the impact on future plans for the business.

- **Advantaged GRC**
  - It helps that all units are using the same terminology now.

**BUSINESS BENEFITS**

- **Siloed GRC**
  - How are we supposed to provide assurance when every department and unit uses different terms and metrics?

- **Managed GRC**
  - It helps that all the units are using the same terminology now.

- **Advantaged GRC**
  - We’re more confident that we can take advantage of risk now.

**GRC MONITORING & METRICS**

- **Siloed GRC**
  - We help every department review controls when there are regulatory or operational changes.

- **Managed GRC**
  - We’re finally getting an enterprise-wide view.

- **Advantaged GRC**
  - We can advise the board and operations better now.
