

# RSA® Governance & Lifecycle Cloud

Work smarter, maximize resources, and reduce identity risk

With evolving compliance requirements, security leaders need to have identity assurance about who has access to what resources and data and maintain a least-privilege security posture. At the same time, many enterprises are actively pursuing their cloud initiatives when adopting new solutions and updating their existing technologies. IT leaders need to find ways to maximize resources, spend budget wisely and predictably, and maintain the highest levels of security and control over data and applications.

With RSA® Governance & Lifecycle Cloud, organizations can recoup the costs and staff time needed to build and manage governance and lifecycle infrastructure. Instead, they can leverage the deep expertise and day-to-day support that the RSA solution provides. Whether you are new to RSA or are planning on moving your current on-premises environment for identity governance and administration (IGA) to the cloud, we can provide the core governance capabilities needed for a comprehensive identity and access management (IAM) solution.

## Free up your internal resources to focus on what's important to your business

As identity takes its place in the center of the security universe, security leaders are seeking to achieve excellence in IAM, system security, and regulatory compliance. This can be a daunting and complex undertaking, but it doesn't have to be.

Since 2004, RSA has provided Fortune 100 and global enterprise customers with the capabilities needed to gain visibility, insight, and control over access to all applications, systems, and data. RSA Governance & Lifecycle Cloud expands the full capabilities of our market-leading solution to the cloud, ensuring that the world's most security-sensitive organizations can work dynamically, accelerate innovation, and advance zero trust security.

RSA Governance & Lifecycle Cloud provides a secure and highly available cloud environment as well as consulting services to customers on the production environment to support the ongoing management of the solution. Operational and managed services elements of the solution reduce the administrative burden on your staff, allowing you to better align your resources towards higher-priority projects that help drive results.

## At-a-glance

RSA Governance & Lifecycle Cloud delivers the full-featured, high performing RSA IGA solution from the cloud and provides day-to-day operational support and management to free up your internal resources.

## Key features

RSA Governance & Lifecycle Cloud reduces organizational risks, enhances security, simplifies access provisioning, and restores security teams' time, bandwidth, and resources to allow you to:

## Focus on visibility

- Allows you to focus on delivering a robust, continuous access assurance framework to reduce identity risk and overall risk to your business
- Simplify and focus on access anomalies and violations through a powerful combination of access visibility, data intelligence, and automated analytics

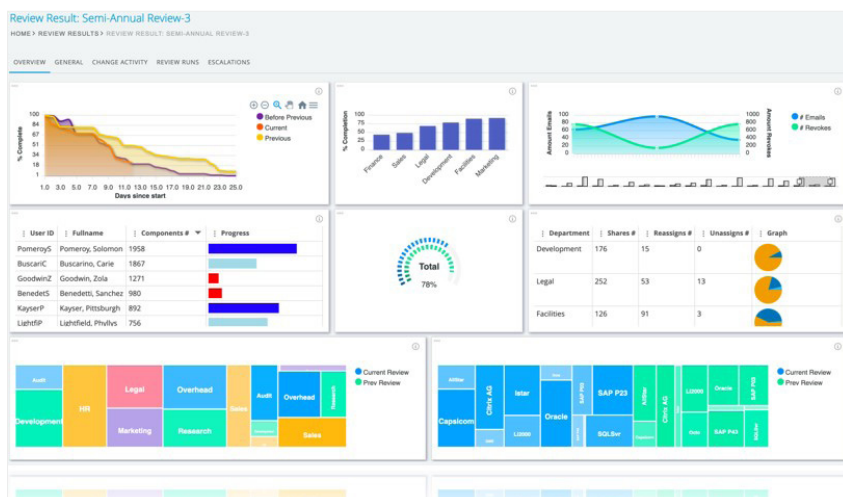

## Automate everything to reduce risk

- Control and reduce costs by automating user onboarding and providing self-service for password resets and access requests
- Build and enforce a solid joiner-mover-leaver policy and process
- Automate provisioning, provide task notification, and integrate with your service desk

Managed RSA Governance & Lifecycle Cloud services include:

- Monitor identity, account, and entitlement collection run status and remediate any issues
- Monitor review campaigns and their progress
- Monitor and remediate any stalled workflow items
- Monitor and notification of failed change requests
- Coordinate with Customer Support as necessary
- Run periodic reports
- Validation after upgrade and patching as necessary
- Review configurations against recommended practices before moving into production
- Perform yearly health check and solution review and make recommendations
- Specialized Advisory Consultant to provide the following on a quarterly basis
  - Identity and access management road-mapping
  - Review architecture and design
- RSA Governance & Lifecycle expansion services
- One annual subscription of Education Services

RSA provides the full visibility you need to uncover access anomalies and policy violations, combining those insights with advanced analytics to prioritize problem areas for action.

## Maintain a sound compliance and regulatory posture

- Create a continuous compliance program with periodic and event-based reporting to ensure the right people have the right access
- Generate reports and dashboards to demonstrate compliance with GDPR, CCPA, SOX, and other regulatory frameworks
- Enforce a least privilege access model and support zero trust initiatives by identifying and eliminating orphaned accounts and over-provisioned users

## Key benefits

- No infrastructure investment; the solution is delivered as-a-service from the cloud
- Gain agility and focus on business outcomes with operational and management support for your IGA solution
- Flexible, convenient pricing—per user, per month subscription model
- Rapid deployment for faster time to solution value
- No functionality compromises—market leading and full featured IGA solution
- Reliability, predictability, and control of IT spend
- IAM at scale—from hundreds to hundreds of thousands of users

## About RSA

RSA provides trusted identity and access management for 12,000 organizations around the world, managing 25 million enterprise identities and providing secure, convenient access to millions of users. RSA empowers organizations to thrive in a digital world, with complete capabilities for modern authentication, lifecycle management and identity governance. Whether in the cloud or on-premises, RSA connects people with the digital resources they depend on everywhere they live, work and play. For more information, go to [RSA.com](https://www.rsa.com).
